Vaccines Are Dangerous: A Warning to the Black Community by Curtis Cost

No HIV virus has ever been proven to exist.... AIDS is not a new disease, but a collection of old diseases renamed, and that the real threat to the public's health are the worthless HIV tests and toxic HIV/AIDS drugs. [1992 first ed] Vaccines Are Dangerous: A Warning to the Black Community by Curtis Cost

Several well meaning researchers have fostered this point of view (AIDS man made virus) in their books, tapes, lectures and news media interviews. These individuals include: Dr. Robert Strecker in his video entitled, The Strecker Memorandum, Dr. Jack Felder author of the book: AIDS U.S. Germ Warfare, Dr. William Campbell Douglas in his book: AIDS The End of Civilization, Leonard G, Horowitz, author of Emerging Viruses and Dr. Alan Cantwell in his book AIDS and the Doctors of Death. Each of these individuals, and others, presented their documentation and they made compelling arguments. I spent a great deal of time credentials, and the soundness of their arguments, it is easy to see why millions came to share their belief that HIV was a man-made virus, and that it was designed to reduce the world's population, especially among Africans and other people with color.

Each of these men had one critical flaw in their arguments and that is, none of them addressed the controversy over whether any HIV virus has ever been isolated! This one issue is the foundation which determines whether the biological warfare theory holds up or crumbles to the ground! For years I accepted the biological warfare theory, but after researching the debate, I now know that the biological warfare theory does not have a leg to stand on. This does not mean that there are not very evil people out there who aren't capable of creating all types of atrocities in secret laboratories. Evil men and women do exist and such laboratories also exist and they have already created nightmarish chemical and biological entities. On the other hand, there is no evidence that HIV was created by anyone, nor that HIV even exists! [1992 first ed] Vaccines Are Dangerous: A Warning to the Black Community by Curtis Cost
