*In 2009, NIAID Director **Anthony Fauci** was firmly in support of a multibillion dollar H1N1 vaccine project*

*Today he is an avid supporter of a COVID-19 vaccine.*

*What he fails to acknowledge is that the 2009 H1N1 Vaccine caused brain damage in children.*

*It was developed by Glaxo Smith Kline which today is at the forefront of the COVID-19 vaccine initiative.*

*Dr. Fauci addresses the H1N1 Vaccine Safety Issue in this video (starting at 6'.50").*

*Scroll down for the reports on H1N1 vaccine scam.*

2009 H1N1 Influenza update

NIAID Director Fauci supported the H1N1 2009 vaccine which turned out to be a multibillion dollar scam.

According to [International Business Times UK in a 2014 report](#)

Patients who suffered brain damage as a result of taking a swine flu vaccine are to receive multi-million-pound payouts from the UK government.

The government is expected to receive a bill of approximately £60 million, with each of the 60 victims expected to receive about £1 million each.

Peter Todd, a lawyer who represented many of the claimants, told the Sunday Times: "There has never been a case like this before. The victims of this vaccine have an incurable and lifelong condition and will require extensive medication."

**Following the swine flu outbreak of 2009, about 60 million people, most of them children, received the vaccine.**

**It was subsequently revealed that the vaccine, Pandemrix, can cause narcolepsy and cataplexy in about one in 16,000 people, and many more are expected to come forward with the symptoms.**

Across Europe, more than 800 children are so far known to have been made ill by the vaccine.

**Narcolepsy affects a person's sleeping cycle**, leaving them unable to sleep for more than 90 minutes at a time, and causing them to fall unconscious during the day. The condition damages mental function and memory, and can lead to hallucinations and mental illness.

## Brain-Damaged UK Victims of Swine Flu Vaccine to Get £60 Million Compensation

By Tom Porter  
March 2, 2014 14:40 GMT

### GSK's H1N1 PandemrixTD vaccine

Glaxo Smith Kline was involved in developing the H1N1 Pandemrix vaccine:

The Pandemrix vaccine made by [GlaxoSmithKline](#) (GSK) was given to 6 million people in Britain and millions more across Europe during the 2009-10 swine flu pandemic, but was withdrawn when doctors noticed a rise in narcolepsy cases among those who received the jab.

In June, a 12-year-old boy was awarded £120,000 by a court that ruled he had been left severely disabled by narcolepsy caused by Pandemrix. The win ended a three-year battle with the government that argued his illness was not serious enough to warrant compensation.

Narcolepsy is a permanent condition that can cause people to fall asleep [dozens of times a day](#), even when they are in mid-conversation. Some suffer from night terrors and a problem with muscular control called cataplexy that can lead them to collapse on the spot. (Guardian, September 25, 2015)

**Big Pharma's Perspective: Never mind the kids... That's the "Collateral Damage" for Big Pharma** which Made billions of dollars selling the H1N1 vaccine.

In a bitter irony, **it was the UK Government (rather than GSK) that paid for the Vaccine Brain Damages in Children.**

But the Brain Damage impacts documented in the UK and EU was but the tip of the iceberg.

Thousands of people got sick from the H1N1 Vaccine (reported and unreported cases).

### GSK's ArepanrixTD applied in Canada

The WHO's H1N1 pandemic was declared in June 11, 2009. GSK was on contract to the Canadian government. The GSK's ArepanrixTM vaccine was delivered to Canadian health authorities **within less than four months**.

"As a result, an impressive 45% of Canadians received protection from the H1N1 virus by being vaccinated with **GSK's ArepanrixTM**" according to GSK'S President-CEO Paul Lucas in a statement on October 9 2009 to Canada's [Senate Standing Committee on Social Affairs, Science and Technology](#).

**Within four months?. Does that give them Time to Test????**

Lots of people in Canada fell sick after receiving the H1N1 **ArepanrixTD** vaccine.

And that vaccine killed a little girl called **Amina Abu**, which then led to a ten year lawsuit against GSK.

The parents of five-year-old Amina Abudu blame her 2009 death on a flu shot. Peter J. Thompson/National Post

A vaccine was rushed to market, and the five year old was among millions of Canadians to get the shot, amid widespread fears about the new pathogen.

Five days later, Amina's older brother found her lying unconscious in the bathroom of the family's east-end Toronto home. She was dead.

Her devastated parents came to blame the flu shot itself and sued the vaccine's manufacturer, Glaxo Smith Kline (GSK), for \$4.2 million. The little-noticed trial of that lawsuit drew toward a close on Tuesday, a rare judicial airing in Canada of a vaccine's alleged side effects.

The parents' lawyer, **Jasmine Ghosn**, alleged the preventive drug was brought out quickly and without proper testing during a chaotic flu season, as the federal government exerted "intense pressure" on Canadians to get immunized. ([National Post, November 2019](#))

## At rare trial of alleged vaccine side effects, parents say H1N1 flu shot killed 5-year-old daughter

*In 2009, Governments faced major pressure to procure the vaccine and administer it widely, but at the same time there were concerns about its safety*

[Screenshot of National Post. Death of Canadian girl in 2009](#) (Report is dated November 2019)

It took ten years for a judgment. The Family lost. GSK declined responsibility for her death. And the Canadian government reimbursed GSK's legal expenses.

That lawsuit against GSK should be reopened. Canada's government bears the burden of responsibility.

### ArepanrixTD (2009) vs PandemrixTM (2009)

GSK has casually acknowledged that the **ArepanrixTD** which was used in Canada is "similar" to the GSK's **PandemrixTM** applied in the UK and the EU, which led to brain damage in Children. It was subsequently withdrawn. But ArepanrixTD applied in Canada prevailed. An ArepanrixTD (2010) was subsequently released the following year (and compared to PandemrixTD (2009)

GSK acknowledges that PandemrixTD (2009) causes narcolepsy, which is categorized as "a chronic neurological disorder that affects the brain's ability to control sleep-wake cycles."

The following is a "statement" by GSK [aired on CTV in November 2013](#). Below are excerpts from the transcript:

#### 3. To date, how many people/children in Canada have reported developing narcolepsy after getting vaccinated with Arepanrix? What provinces do they reside in Canada?

GSK reports all cases of adverse events which the company is aware of in accordance with national and regional regulations. **We respectfully defer to the Public Health Agency of Canada to address this question in more detail.**

#### 4. We read that there is currently a Canadian study sponsored by GSK to assess the risk of occurrence of narcolepsy following the administration of Arepanrix – Why did you sponsor that study? When will the results of that study be published?

We are currently supporting a study that is being conducted in Quebec where Arepanrix™ (H1N1) was used. Further research is needed to evaluate the potential association between GSK's adjuvanted **H1N1 pandemic flu vaccine and narcolepsy in a country where a similar vaccine to Pandemrix™ (H1N1)** was used, and where a more robust assessment of the potential association could be conducted, using a design aimed at limiting the impact of biases. The preliminary results of this study are anticipated to be published by early 2014.

## Flash Forward to 2020

### GSK Was ordered to Withdraw its PandemrixTD Vaccine in the UK.

The same companies involved in 2009 are at it again.

Big Pharma is reported to be Developing a "Safe" COVID-19 Vaccine:

Drug companies and scientists all over the world are actively engaged in this call to arms, with at least five candidate vaccines in clinical evaluation and another 71 in clinical preclinical evaluation, [according to the World Health Organization](#) (WHO). (CTV report, April 28, 2020)

## Media Hype. The H1N1 Fear Campaign

In 2009 The US Media was Complicit in Spreading Fear and Spreading Lies (and they are doing it again in relation to COVID-19).

The media hype was instrumental in supporting Big Pharma's H1N1 Vaccine and so was the Obama Administration. It was a Multibillion dollar scam:

**"Swine flu could strike up to 40 percent of Americans over the next two years and as many as several hundred thousand could die if a vaccine campaign and other measures aren't successful."** (Official Statement of Obama Administration, Associated Press, 24 July 2009).

**"The U.S. expects to have 160 million doses of swine flu vaccine available sometime in October"**, (Associated Press, 23 July 2009)

**Wealthier countries such as the U.S. and Britain will pay just under \$10 per dose [of the H1N1 flu vaccine]. ... Developing countries will pay a lower price.** [circa \$40 billion for Big Pharma?] ([Business Week](#), July 2009)

But the H1N1 pandemic never happened.

The H1N1 pandemic was a scam endorsed by the CDC and the NIAID headed by Dr. Fauci

There was no pandemic affecting 2 billion people...

Millions of doses of swine flu vaccine had been ordered by national governments from Big Pharma. Millions of vaccine doses were subsequently destroyed: a financial bonanza for Big Pharma, an expenditure crisis for national governments.

**There was no investigation into who was behind this multibillion fraud.**

**Several critics said that the H1N1 Pandemic was "Fake"**

The Parliamentary Assembly of the Council of Europe (PACE), a human rights watchdog, is [publicly investigating](#) the WHO's motives in declaring a pandemic. Indeed, the chairman of its influential health committee, epidemiologist **Wolfgang Wodarg**, [has declared that](#) the "false pandemic" is "one of the greatest medicine scandals of the century." ([Forbes](#), February 10, 2010)

According to the **British Medical Journal**:

The World Health Organization's handling of the swine flu pandemic was **deeply marred by secrecy and conflict of interest with drug companies**, a top medical journal said Friday.

The British Medical Journal, or BMJ, found that **WHO guidelines on the use of antiviral drugs were prepared by experts who had received consulting fees from the top two manufacturers of these drugs, Roche and GlaxoSmithKline, or GSK.**

In apparent violation of its own rules, the WHO did not publicly disclose these conflicts when the guidelines were drawn up in 2004, according to the report, jointly authored by the London-based non-profit Bureau of Investigative Journalism.

The WHO's advice led governments worldwide to stockpile vast quantities of antivirals, **and its decision to declare a pandemic in June 2009 triggered the purchase of billions of dollars worth of hastily manufactured vaccines.**

Much of these stocks have gone unused because the pandemic turned out to be far less lethal than some experts feared, fueling suspicion that Big Pharma exerted undue influence on WHO decisions.

The report also reveals that **at least one expert on the secret, 16-member "emergency committee" formed last year to advise the WHO on whether and when to declare a pandemic received payment during 2009 from GSK.**

Announcing that swine flu had become a **global pandemic automatically triggered latent contracts for vaccine manufacture with half-a-dozen major pharmaceutical companies, including GSK.** The WHO has refused to identify committee members, arguing that they must be shielded from industry pressure. "The WHO's credibility has been badly damaged," BMJ editor Fiona Godlee said in an editorial.
