

"No One Has Died from the Coronavirus" – Respected Bulgarian Doctor

Published 22 hours ago on July 7, 2020

Last Updated on July 7, 2020

“No One Has Died from the Coronavirus” – a respected 30-year career Bulgarian doctor reveals how autopsies show COVID is not the cause of death, as reported by many European pathologists.

No one has died from the coronavirus

according to Dr. Stoian Alexov, a veteran and highly renowned Bulgarian doctor. Dr. Alexov has been a physician for 30 years, is [the president of the BPA](#) (Bulgarian Pathology Association), is a member of the [ESP's Advisory Board](#) and head of the histopathology department at the Oncology Hospital in the Bulgarian capital of Sofia. Dr. Alexov made the

stunning claim in this [video](#) (speaking in his native Bulgarian). An English translation of the transcript is available [here](#) thanks to Rosemary Frei and Patrick Corbett who wrote a recent article about it posted at [Off Guardian](#). For those who may be unfamiliar with it, histology (also known as microscopic anatomy or microanatomy) is the branch of biology which studies the microscopic anatomy of biological tissues. Histopathology is the microscopic examination of tissue in order to study the manifestations of disease. Dr. Alexov reveals that European pathologists haven't identified any antibodies that are specific for SARS-CoV-2, and furthermore states that he thinks it's impossible to create a vaccine against the SARS-CoV2 virus that is causing COVID. The lack of proven **COVID antibodies** is further evidence that the virus does not really exist, as I discussed in other articles where I pointed out that its [fails Koch's postulates](#), the gold standard in microbiology.

Claim: No One Has Died from COVID

So, how could this doctor, experienced as he is, support the extraordinary claim that no one has died from the coronavirus? Let's consider his exact words:

"The main conclusion was that the autopsies that were conducted in Germany, Italy, Spain, France and Sweden do not conclude that the virus is deadly ... I will explain why I'm not crazy ... I'm explaining this from the perspective of pathology. And as a professional who's working in pathology, we have certain procedures, protocols, which we apply to necropsy as well as to biopsy. Our protocol should list the first disease, second disease, third disease and reason for the death. When we say that the patient died because of the coronavirus, we mean that the coronavirus led to interstitial pneumonia, afterwards leading to the death of the person, with no other diseases in other organs and in other systems. But such facts haven't been found; nobody has reported this."

He then elucidates the **central scam** of this entire **fake pandemic**: dying **with the virus** vs. dying **from the virus**. This has been the key piece of manipulation all along, to ascribe deaths from other existing comorbidities to COVID in order to ratchet up the death count:

"And the people who died, did they die from the coronavirus, or with the coronavirus? The real term we use is that the people in Italy and France and in Spain are dying with the coronavirus — not from the coronavirus — on the top of their very poor clinical picture from their illness [i.e., they had serious comorbid disease(s)]."

He alludes to the pressure being put on pathologists and doctors worldwide to water down and ignore their usual medical procedures and standards to accommodate this scam:

"At the moment it's a total resistance of the pathologists in Europe, in China, as well as in Australia and in Canada [because] the pathologists have been pushed and pressured: if the patient has a coronavirus, the reason for the death is to be written that it's nothing else but the coronavirus. That's quite stressful for us, and for me in particular, because we have protocols and procedures which we need to use."

He talks about how the WHO (World Health Organization), funded by Bill Gates who will move from being the 2nd biggest funder to the biggest funder, is actually obstructing nations from following established protocols of pathology to determine cause of death:

“Dr. Alexov: In this case, now there is the WHO that doesn’t want us to do autopsies. I’m not clear why the WHO doesn’t want us to do autopsies when we need to prove what is the strength of the virus ... I don’t know why the WHO doesn’t really want us to do autopsies; I assume they have the information that the virus is not deadly.

Dr. Katsarov: Is this the reason that in Bulgaria we’re not doing the autopsies?

Dr. Alexov: Yes. We’re required to follow the WHO. And I’m really sad that we need to follow those instructions without even thinking about them. But in Germany, France, Italy and England they’re starting to think that we shouldn’t follow the WHO so strictly, and when we’re writing the reason for death we should have the pathology [results to back that up] and we should follow the protocol. [That’s because] when we say something we need to be able to prove it.”

The COVID Antibody Problem

I have covered in this previous article [COVID Antibody Tests: Here Comes More Trickery and Fakery](#) that the antibody test (also called the serology test) authorities are starting to roll out are rife with flaws. Dr. Alexov points out how, when he questioned his professional colleagues, they confirmed that no one has found any COVID antibodies in the bodies of the deceased during autopsy examination. In the quotes below, Dr. Alexov refers to monoclonal antibodies, which are defined as antibodies that are made by identical immune cells which are all clones of a unique parent cell. (Monoclonal antibodies specifically bind to a certain substance, so they can serve to detect that substance, and thus are an important tool in molecular biology.)

“Dr. Katsarov: What are the specifics of the clinical picture from the histology of the coronavirus that makes it different from the seasonal flus and other respiratory diseases?

Dr. Alexov: I asked exactly the same question to Professor Moch [Dr. Holger Moch, professor of pathology at the University of Zurich] ... two doctors from Italy asked if there is a specific monoclonal antibody which we can use in our pathology work to prove that the coronavirus [is present]. Is there such an antibody that’s been isolated? [Dr. Moch answered that] such a monoclonal antibody hasn’t been isolated — they don’t know of the existence of such an antibody at the moment.

The second question is, is there a different monoclonal antibody that we can use to diagnose a coronavirus infection when we do a biopsy?

And for both questions they answered no, there is no such antibody that we can use to prove coronavirus

is present in a biopsy or in autopsy tissue.

In Bulgaria we've done three autopsies [on people whose deaths were attributed by COVID-19], [all conducted] by Dr. Nia Serbianova [spelling?][she's the head of clinical pathology at Pirogov Hospital]. She asked the same question about this antibody to experts from Italy and Spain. They replied that there's no such monoclonal antibodies. What all the pathologists said is that there's no one who has died from the coronavirus. And I will repeat that: no one has died from the coronavirus."

It is Impossible to Create a COVID Vaccine

I have covered some of Gates' quotes and shenanigans regarding [depopulation](#), [digital certificates](#) and [COVID vaccines](#) elsewhere. The concept of digital certificates or immunity passports is well under way with the launch of [Covi-Pass \(COVI-PASS™\)](#) in [15 nations](#). Dr. Alexov had some choice words for the WHO and Gates:

"And again I won't talk specifically about a pandemic, because I believe we don't have the facts necessary to call it a pandemic. I think it's not reasonable that the World Health Organization is still saying 'pandemic' – it's an epidemic. I haven't seen such an 'advertisement' for a virus [before]."
"The WHO is creating worldwide chaos, with no real facts behind what they're saying."

"I'm certain it's not possible to create a vaccine against COVID. I'm not sure what exactly Bill Gates is doing with his laboratories – is it really a vaccine he's producing, or something else? [joking/laughs]"

In a personal email to Patrick Corbett (see aforementioned Off Guardian article for image), Dr. Alexov wrote:

"I do believe the WHO is the best criminal medical organization."

There is No Pandemic and No Epidemic

Dr. Alexov states emphatically at several points in the interview that there is no pandemic and there is no epidemic:

"... yearly about a million and a half people die [worldwide] from lung cancer due to smoking. If we compare that to the coronavirus, it would be like a pandemic and everybody [would be told to] stop smoking – let's say 'a pandemic of smoking' ... So I will say that this epidemic isn't so much an epidemic of the virus, but it's an epidemic of giving people a lot of fear and stress."
"I want to accentuate that: it's an infection, not a pandemic."

Final Thoughts

More and more doctors and medical professionals are courageously speaking out to counter the COVID propaganda spewed out by the WHO, UN and governments worldwide. The emperor has no clothes. No one has died from COVID

in the bodies that these European doctors examined. The virus has never been proven to exist, and now we have more evidence of this in the form of certified pathologists stating that there is no proof of the existence of COVID antibodies as well. It is staggering to realize that all the tangible damage that has been to communities everywhere – the destruction of small businesses, the increase in crime and domestic violence, the propagation of anxiety, stress and fear – has all been done in the name of a non-existent danger. We must attack this psychological operation at its foundation, because as long as it's allowed to continue, more tyranny will be predicated on the basis of this hyped and invented threat.
