2. Work performed will be on a collaborative basis with Dr. Gallo and his laboratory unless stated otherwise.
3. H9 or H9/HTLV-IIIg will not be used for commercial purposes. A U.S. Government (National Cancer Institute) patent is in effect.
4. Use of the line or virus produced from it will be in P3 containment.
5. Any operations using the infected cell outside of biocontainment will be after treatment such as gluteraldehyde fixation.
6. Work with HTLV-III will not be published without prior approval by Dr. Gallo.
7. Reagents will not be used in comparisons with other viruses. They will only be used for seroepidemiologic studies and blood bank assays.
